This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Currently Amended): A hydrotreating catalyst comprising at least one element of groups VIB and group VIII of the periodic table and optionally at least one of phosphorus and silicon deposited on a porous substrate, and as an additive an at least one organic compound containing at least one nitrogen atom, said organic compound being of the formula:

in-which:

$$X = CH_2$$
, NH-, NR-, O, with R = H, alkyl or alkenyl;

$$Y = CH_3$$
, OCH_3 , NH_2 , $NR3R4$, $Si(OCH_3)_3$, OH with $R3$ and $R4 = H$, alkyl or alkenyl;

$$\Lambda = O$$
, NH, (CH₂)_t with t = 1 to 11, C_nH_{2n-2} with n = 1 to 11, or else

Claim 2 (Cancelled)

Claim 3 (Currently Amended): A catalyst according to claim 2, comprising 1, comprising said compound that contains at least one primary, secondary and/or tertiary amine group wherein said compound is hexamethylenediamine, monoethanolamine, diethanolamine, triethanolamine or N,N-dimethyl-N'-ethylethylenediamine.

Claim 4 (Currently Amended): A catalyst according to claim 2 1, comprising said amino alcohol wherein said amino alcohol is 2(2-amino ethyl amino)ethanol, 2(2-amino ethoxy)ethanol, 2-amino-1-butanol, 4-amino-1-butanol, 2,2-diethoxyethylamine, 4,4-diethoxybutylamine, 6-amino-1-hexanol, 2-amino-1,3-propanediol, 3-amino-1,2-propanediol or 3-amino-1-propanol.

Claim 5 (Currently Amended): A catalyst according to claim 2 1, comprising said amino-alkoxy-silane wherein said amino-alkoxy-silane is (3-glycidoxypropyl)trimethoxy silane, 3-(2-aminoethylamino)propyl-trimethoxysilane or (3-aminopropyl)trimethoxysilane.

Claim 6 (Previously Presented): A catalyst according to claim 1, wherein the amount of said organic compound in the catalyst is 0.05 to 2.5 mol per mol of metal (metals) of group VIB and/or of group VIII deposited on the substrate.

Claim 7 (Previously Presented): A catalyst according to claim 6, wherein the amount of said organic compound in the catalyst is 0.1 to 1 mol per mol of metal (metals) of group VIB and/or group VIII deposited on the substrate.

Claim 8 (Previously Presented): A catalyst according to claim 1, wherein said porous substrate comprises at least 40% by weight of alumina.

Claim 9 (Previously Presented): A catalyst according to claim 8, wherein said porous substrate consists essentially of alumina or silica-alumina.

Claim 10 (Currently Amended): A catalyst that is obtained from a catalyst according to claim 1 in calcined form.

Claim 11 (Previously Presented): A catalyst according to claim 1 in sulfurized form.

Claim 12 (Previously Presented): A process for preparation of a catalyst according to claim 1, comprising impregnation of a porous substrate by the metal or metals of group VIB and/or group VIII and the deposit on said substrate of said organic compound.

Claim 13 (Currently Amended): A process according to claim 12, wherein it comprises comprising:

an impregnation stage of the porous substrate by the metal or metals of group VIB and/or group VIII;

a drying stage; and

a stage for depositing said organic compound.

Claim 14 (Previously Presented): A process according to claim 13, wherein the drying stage is followed by a calcination stage.

Claim 15 (Previously Presented): A process according to claim 12, comprising:

a simultaneous impregnation stage of the metal or metals of group VIB and/or of group

VIII and of said organic compound; and
a drying stage.

Claim 16 (Previously Presented): A process according to claim 15, wherein the drying stage is followed by a calcination stage.

Claim 17 (Previously Presented): A process according to claim 12, wherein it comprises:

a stage for depositing said organic compound;

a drying stage; and

a stage of impregnation of the porous substrate by the metal or metals of group VIB and/or group VIII.

Claim 18 (Currently Amended): A process according to claim 4 12, further comprising a sulfurization stage.

Claim 19 (Previously Presented): A process according to claim 18, wherein the organic compound is present in the sulfurization feedstock and is deposited during the sulfurization stage.

Claim 20 (Previously Presented): In a catalytic process comprising at least one of hydrodesulfurization, hydrodenitrification, hydrodemetallization, hydrogenation or hydroconversion of a petroleum fraction the improvement wherein the catalyst is according to claim 1.
